## Liquid Waste Disposal

***Does your company generate waste issues like these?  
Unable to dedicate time to manage your waste?  
Unsure of what is contained in your drums?***

**Amiante Limited** have identified that waste management is a specialist role for trained competent personnel to ensure your company remains compliant within the Hazardous Waste Regulations 2005, *formerly (The Special Waste Regulations 1996)*

To avoid your company employing trained personnel, Amiante Ltd have selected a dedicated team of experienced, technically competent people whose abilities are supported by recognised accreditations within the waste management industry, to provide the exact level of services you require.

Our **Hazardous Waste Team**, in conjunction with your specifications will produce a total waste management programme bespoke to your company requirements. The focus of the service includes:

- **On site survey and full audit report by a qualified assessor.**
- **Containment, storage and segregation advice including the supply of equipment eg storage bunds, colour coded drums to aid waste segregation etc.**
- **Waste identification and labelling support.**
- **Cost effective transport and disposal route services.**
- **Paperwork and tracking procedure implementation.**
- **On site training and awareness programmes.**

If you are unsure if your company are operating within current waste regulations, by calling our **Hazardous Waste Team** on **020 8531 4969** you have taken the first step towards the process of achieving full compliance.

***Please remember ... Any registered waste carrier can take hazardous waste off your hands, Amiante will take it off your mind, allowing you to do what you do best.***
