

Quality Policy Statement

Buckingham Group Contracting Limited is a Contractor operating in the Civil Engineering and Building Industry. The Company undertakes projects in the Highways, Rail, Sports Stadia and Commercial and Industrial Development Sectors. Specific operations include Demolition, Land Remediation, Geotechnical Engineering, Civil Engineering, Structural Works, and Building Construction.

Buckingham Group Contracting Limited is committed to providing, maintaining and developing a professional service to its customers. This service will meet the specific expectations and requirements of the customers and it will be delivered in a manner, which combines quality and technical excellence with timely, cost effective and safe execution of the works.

To this end the Company has implemented an Integrated Business Management System which complies with the requirements of BS EN ISO 9001:2008. The Integrated Business Management System has been developed to regulate the requirements of the Standard and is the basis upon which all the Company operates.

The provisions of the Integrated Business Management System are mandatory upon all Employees and suppliers where appropriate. It is emphasised that all Employees are responsible for, and directly contribute towards, the quality of our service.

Compliance with the Integrated Business Management System is assured through a regular programme of Internal Quality Audits and Management Review, and through accredited third party certification.

The Company is committed to the continual improvement of the Integrated Business Management System and sets annual quality objectives to support this policy.

Responsibility for the management, maintenance, development and review of the Integrated Business Management System lies with the Management Representative. Individual responsibilities lie with the Directors, Site Managers and Job Holders for each operating department throughout the Buckingham Group.

P. W Wheeler
Managing Director
