

## Education

### Glenthorne High School – Jubilee Wing

Glenthorne High School is a school with a long and rich history in the local community. The school was founded on the Glastonbury Road site in 1933. It moved to the Sutton Common Road site in 1958. At this time, it was called Sutton Common County Secondary Girls' School; a small girls' school for less than 400 pupils. It changed its name to Glenthorne in 1982 and it wasn't until 1993 that it became co-educational. The school today is a thriving, highly successful, mixed comprehensive school for 1300 pupils between the ages of 11 and 19, a Specialist Arts College, a Training School and an Applied Learning School.

The project (currently in construction) involves the construction of a new two-storey extension wing at Glenthorne High School in outer London to provide new teaching accommodation; including a new Sixth Form area and Opportunity Base for pupils with mild Autistic Spectrum Disorder (ASD).

Project Manager – Scott Wilson

Architect / Structural Engineer – Scott Wilson

M&E Services Engineer – Graham Powell Consultants

Cost Consultant – MEA Consultants

Principal Contractor – Sunninghill Construction Co. Limited

CDM Co-ordinator – edpConstruction

Project Duration – 50 weeks

## Education

### Glyndŵr University – Design Technology Media Centre (DeTMeC)

The North East Wales Institute of Higher Education (NEWI) is now Glyndŵr University. The change of name and status heralds an exciting new era for Wrexham, Wales, the borderlands and the academic world, as Glyndŵr becomes the youngest university in Wales.

The project (currently in design) involves the construction of a four storey, state of the art Design Technology and Media Centre. The ground floor will house TV and radio facilities as well as a cafe and terrace, the first floor games and 3D modelling facilities, the second floor post-graduate and undergraduate design studios and the third floor incubator units and a training centre.

## Education

### Manchester Metropolitan University (MMU) – John Dalton Building

Manchester Metropolitan University (MMU) is one of the leading universities in the UK and the central Manchester campuses form part of the largest higher education campus in the UK and one of the most extensive education centres in Europe.

edpConstruction has been involved with MMU for a number of years now; most prominently being involved in the complete phased asbestos removal, demolition and fit-out of the John Dalton Building to provide new state-of-the-art medical research and teaching facilities including new lectures and seminar rooms.

Architect / Structural Engineer – Pickard Finlason Partnership

M&E Services Engineer – Engineering Design Partnership

Cost Consultant – Appleyard and Trew

Principal Contractor – John Coulson Contractors / ACT Limited / B&E Boys

CDM Co-ordinator – edpConstruction

Project Duration – 120 weeks

Project Value – £6m

## Education

### University of Chester Westminster Building

The University of Chester is one of the oldest providers of higher education in the country, with their academic roots stretching back to the early 19th century. The Faculty of Health and Social Care is one of the major providers of health and social care education in the North West and offers a wide range of programmes at both undergraduate and postgraduate level.

The New Nursing Unit project involved the construction of a state of the art three storey building (with green roof) comprising clinical skills ward teaching facilities, lecture theatres and catering facilities.
