

Environmentally FRIENDLY PRINTING

Graphic Press now offer a print service with an environmental standpoint.

We can now offer environmentally friendly print to help reduce your carbon footprint.

We're committed to providing the highest quality print products, in the most environmentally sensitive way on the most sustainable paper stocks to help with your budgets and deadlines.

If you use our eco service, your print will be produced using recycled paper stock and oil free inks, we have a wide range of recyclable paper to chose from, these can be 50% to 100% recycled.

Quality of print is not effected by using these paper stocks but while we are helping to save the environment, by ordering recycled print, you are also helping your carbon footprint.

Prices for printing are similar to our prices on our web site but please allow for increases on recycled materials from our range.

Please contact us for more info or samples which we can post to you.
