

Final Stand design for Educatec 2007 Paris

During 2007 we completed a large number of be-spoke exhibition stands throughout Europe. One of our biggest exhibition clients required us to design and construct two stands one for Paris and one for Berlin only 1 week apart.

We started off with concepts for the stands and on approval built the structures designed and output the graphics, custom made the seating and installed the electronic equipment. The whole process was achieved through the internet as the client Smart is based in Canada.

Stand for Education Show at The Hotel Intercontinental Berlin

Completed Stand design for Educatec 2007 Paris

From concept to completion however big or small the stand we have the skills to deliver
