

Brillant 201 Cut Off Machine

Simple. Dependable.

The **Brillant 201 Cut Off Machine** is the perfect choice for a simple format, wide capacity metallurgical saw. The 3kW (4 HP) motor and 256mm(10") cut off wheel have the capacity to cut a 95mm round cross section.

A stainless steel lift door combined with a solid welded aluminium frame make the Brillant 201 durable and corrosion resistant.

Controls are simple to use and mounted high on the panel away from the wet cutting environment. A separate 45 litre recirculation tank is mounted on roller wheels for easy cleaning. An illuminated interior gives an excellent view of the cut.

The Brillant 201 is an excellent choice when a basic, yet durable machine is needed for final, deformation-free cutting.

Brillant 201 Cut Off Machine

Max Cutting Capacity:
95 mm / 3.75" Diameter

Max Cut Off Wheel Size:
256mm / 10"

Arbor Size: 32mm / 1 1/4"

Speed: 2750 rpm

Recirculating System:
45 Litres / 12 gallons

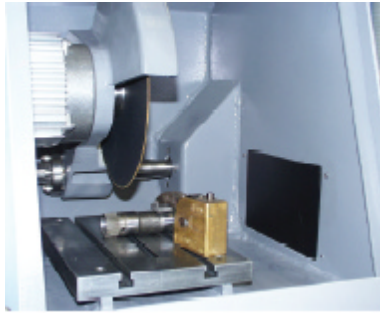

Power:
3kw (4 HP) , 415V,
3 Phase

Dimensions W x H x D:
710 x 550 x 550 mm

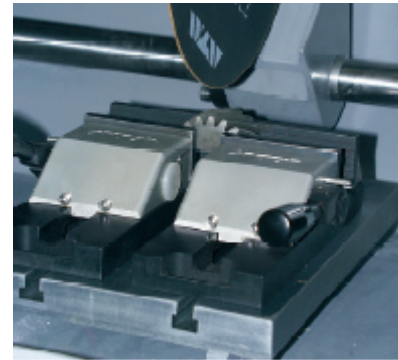

Weight: 68 kg

Optional:

SystemLab
Furniture Base Cabinet
Dimensions W x H x D
880 x 815 x 650mm

Wide open work area with a **T-slot Table** for a variety of clamping options.

The **Clamp 80 System** is the best designed quick-clamping system on the market.

Unique, **Dual Chamber Recirculation System** with stainless steel basket and filter bag preserves coolant longer.

The **SystemLab Base Cabinet** (pictured above with the Brillant 250) provides convenient storage of the recirculation tank
