

Opal 400 Automatic Mounting Press

Basic. Trustworthy.

The **Opal 400 Automatic Hot Mounting Press** is rugged and efficient. With ATM's thirty years of experience building high pressure hydraulic systems, the Opal 400 utilizes a sound design with reliable electro hydraulic operation and water cooling.

The solid stainless steel bayonet closure will not bind or cross thread even during high volume repetitive mounting cycles.

Each cylinder size, up to 40 mm, can be easily interchanged.

The heating and water cooling sleeve is machined from solid brass and uses easily replaceable heating elements.

The Opal 400 is perfect for busy labs that rely on daily basic mounting and require the time savings advantage of automatic operation.

Opal 400 Automatic Mounting Press

Available Mold Sizes:
25 - 40mm Round
1 1/4", 1 1/2"

Motor:
2.0kW

Power:
230V, 1 Phase

Heating System:
4 x 400 W

Temperature Range:
0 - 200 ° C

Heating Timer Range:
1 - 30 mins

Hydraulic Pressure:
0 - 120 Bar

Cooling Timer Range:
1 - 30 minutes

Dimensions W x H x D:
350 x 350 x 380 mm

Weight: 20 kg

Optional:

Recirculating System:

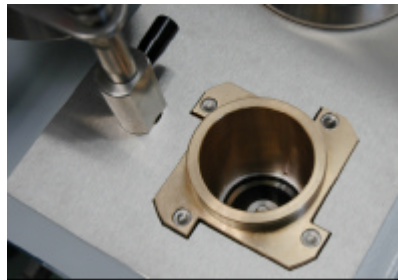

SystemLab
Furniture Base Cabinet
Dimensions W x H x D
880 x 815 x 650mm

Solid Stainless Steel Bayonet Closure will not bind or cross-thread.

Clean working surface and low profile design make the **Opal 400** easy to use.

Unique **Heating and Cooling Sleeve** uses four easily replaceable heating elements.

Optional **Recirculation Coolant System** maintains constant water temperature with refrigeration coils.
