

Inserting a Background Image

Images must be uploaded to the Image Manager before attempting to insert them.

Enter the Main Content Background Image:	bg.gif
Enter the Main Content Background Position:	center right
Enter the Main Content Background Repeat:	repeat-x

1. Go to the 'Website Design - Advanced Setup' page.
2. Scroll down the page to the section that you want to add the background image to. A different background can be added to each area; Header, Footer, Page Content and the overall Page Layout.
3. Select an image from the 'Background Image' dropdown.
4. Select the background position from the 'Background position' dropdown.
5. Select a 'Background Repeat' from the next option.

Repeat = Tiled image filling the header area.
Repeat-y = Image will repeat top to bottom
Repeat-x = Image will repeat left to right
No Repeat = Image will display once

Note: Selecting 'User Defined' will open up a blank box allowing you add a custom setting. It is only recommended that you use this option if you are competent using CSS coding. Correct CSS code needs to be entered here for this feature to work.

6. Click the submit button to save the changes.
7. View your web page and refresh it to see the header image you have added.

Deleting a Background Image

1. Go to the 'Background Image', 'Background position' and 'Background Repeat' sections and choose 'Please Select...' from the dropdown menu.
2. Click Submit.
3. View your web site and refresh the browser to see the changes.

For more information see the 'Using Images' section of the Support Centre.
